15th International Meeting

Danubian League Against Thrombosis and Haemorrhagic Disorders

Dear colleagues and friends,

On behalf of the Organizing Committee and on my own behalf I wish a most cordial welcome to all participants of the 15th Danubian League Meeting Against Thrombosis and Haemorrhagic Disorders, taking place from May 14 to 16, 2009 in Belgrade, capital of the Republic of Serbia.

By its primordial energy, the allmighty Danube brings closer and unites people of various nationalities, religions, languages and cultural heritage. Almost thirty years ago Danube was the originator of the visionary professor Helmut Vinazzer's idea of creating the Danubian League Against Thrombosis and Haemorrhagic Disorders. Based on the Danubian affiliation, the Danubian League, in all its creative enthusiasm, gathers together the experts of various medical and biological specialties, whose fundamental field of interest resides within thrombosis and haemorrhagic syndromes.

It is our mutual wish to make the forthcoming meeting in Belgrade a strong stimulus for the improvement of traditional, professional and scientific regional cooperation.

Waiting for you openheartedly, wishing to make all three Belgrade Danubian League Meeting days memorable by the most up to date achievements in domain of haemostasis disorders research and by the friendly social activities, I address you once more with a most sincere and warm invitation to the next Danubian League Meeting in Belgrade, famous by its cordial hospitality.

Sincerely Yours,

Professor Aleksandar Lučić, MD
President
DLTH Meeting 2009
